

# Forging smart connections.

At Bsquare, we help bring deep connections to life. With embedded and mobile solutions that enable the creation of smart devices—devices that allow people to communicate and collaborate in modern, meaningful ways. It's an ability borne from our many years of tackling the biggest challenges, and helping create some of the most sophisticated devices. In fields ranging from automotive to aerospace, and medical to mobile.

## The Mobile & Embedded Systems Experts

Bsquare is an industry leader with a proven track record in providing engineering services and production-ready software products for the smart device market. Since 1994, Bsquare has provided device manufacturers with software solutions for personal navigation devices, point-of-sale terminals, handheld data terminals, smartphones and many other device categories, allowing them to get to market more quickly and cost effectively.

Our teams can collaborate with customers at any stage of the product development lifecycle.

As a complete solutions provider, Bsquare offers engineering services and products to speed device development, Windows CE and XP training, technical support, TestQuest testing solutions and Windows Embedded licensing.

We maintain strategic alliances with Microsoft, all major silicon vendors and other leading technology companies. With our in-depth knowledge of operating systems and silicon technology, expertise in all stages of device development, time-saving solutions and licensing knowledge, we can help you rapidly and efficiently take your smart device from concept to market.
